Mr. Shivaji Rai
(Assistant Professor, School of Arts & Humanities)

- Invited as a Judge for Speech and Poetry Competition which was organized under the joint aegis of Nehru Yuva Kendra and Rabindranath Tagore University, Bhopal on June 19, 2023.

Ms Swejal Sharma
(Assistant Professor, School of Arts & Humanities)

- Received Atmamanthan Award on 4th June 2023.

Publications

Dr. Sanjeev Kumar Verma

(Head, IQAC)

- Research Paper titled “Carbonation Based Deterioration of Concrete Structures and Effect of Carbonation Curing” in the SCOPUS indexed Journal “International Journal of Structural Engineering” with ISSN No. 1758-7336, DOI: 10.1504/IJSTRUCTE.2023.10055579

Mr. Rahul Tiwari

(Assistant Professor, School of Performing Arts)

- Published a research paper on “Study of Story boarding Importance in Films” in an International Journal of Novel Research and Development Vol. 8 (6) ISSN: 2456-4184, May 2023.
- Published a research paper on “Penetrating the Layers of Oedipus Complex in Nand Kishor Acharya’s Dehantar” in a Journal of Advance Multidisciplinary Research studies and Development, Vol. 2(1) ISSN: 2583-6404.

Dr. Rakhee Kapadia

- Published a research article on “Nano-Emulsomes for Back of the Eye Delivery of Ganciclovir: Formulation Optimization, Characterization & In Vitro/In Vivo Evaluation” in Pharmaceutical Development Technology, 25:1-12, May 2023. (Impact factor- 4.0).
- Published a review article on “Atopic Dermatitis: Comprehensive and Extended Epidemiology, Management and Treatment Schema- Newer Insights” in International Journal of Pharmaceutical Research and Applications, 3:2107-2127.

Dr. Khushboo C Sandhu

(Assistant Professor, School of Management & Commerce)

- Published a research paper on A Study on Digital Transformation for Leaders during Covid-19

Pandemic: Opportunities and Challenges in a Journal Samdarshin ISSN 2581: 3966 Vol. 16 (2).

Dr. Anamika Rawat

(Assistant Professor, School of Management & Commerce)

- Published a research paper on A Study on Digital Transformation for Leaders during Covid-19 Pandemic: Opportunities and Challenges in a Journal Samdarshin ISSN 2581: 3966 Vol. 16 (2).

Mr. Aman Shukla

(Assistant Professor, School of Management & Commerce)

- Published a research paper on A Study on Digital Transformation for Leaders during Covid-19 Pandemic: Opportunities and Challenges in a Journal Samdarshin ISSN 2581: 3966 Vol. 16 (2).

Dr. Priya K Dubey

(Associate Professor, School of Management & Commerce)

- Published a paper on “A Study on Factors that Contribute to the Success of B2B E-Commerce towards Manufacturing Industries” in the Journal of Harbin Engineering University, Scopus Journal, Vol. 44(5), 2023.

Dr. Sunil Atulkar

(Associate Professor, School of Management & Commerce)

- Published a research paper on “E- Supply Chain Management: A Study among Small and Medium Enterprises in Mandideep Industrial Area: A Literature Review” in a Journal of Management and Entrepreneurship ISSN: 2229-5348.
- Published a research paper on “Innovative based Transformations in the Educational System” in a Poetique Journal, Vol. 10(5) ISSN: 0032-2024.

Giorgio Armani to Stage Couture Show during Venice Film Festival

Armani Privé, the Italian designer's haute couture line, will present its next collection on September 2 at the Venetian Arsenal before hosting a party to "celebrate cinema and to pay tribute to the city that most symbolises it" the brand ambassador said in a statement.

Giorgio Armani arrives at the Venice Film Festival in 1990.

Theatre artists have always re-interpreted the past to anticipate alternative futures. The play *Formations*, by Meg Braem, performed at University of Calgary in June 2022, narrates the stories of four under-recognized female scientists. (Tim Nguyen)

Strategic Foresight about Theatre in Future

Theatre as an art form asks audiences to "suspend their disbelief" and activate their imaginations. But it is a challenge for a number of theatre practitioners to imagine what the future of theatre might look like in 2040, and this is quite a different prospect.

This is what Prairie-based artists and researchers with the Future Prairie Theatre research team undertook. Together, they studied issues specific to theatre in the Canadian provinces of Alberta, Saskatchewan and Manitoba.

They worked with strategists Jessica Thornton and Heather Russek, whose work in their Creative Futures Studio is about anticipating potential futures and better preparing for inevitable change — a visioning and planning process known as "strategic foresight." This project was supported by the Social Sciences and Humanities Research Council.

Cardi B collaborating with Shakira

Shakira and Cardi B. Credit: Gustavo Caballero / Kevin Mazur / Getty Images

Cardi B has been rumoured to be releasing a huge summer collaborative single with Shakira in the coming months.

An upcoming single with the Columbian singer-songwriter hasn't been formally announced, but the rumours of the Shakira collab started after a track titled 'Estoy Lamida' was found on the BMI record label's website. The song is registered under both Cardi B and Shakira's names and the database is where artists and their record labels register upcoming music in preparation for a release.

Kurt Cobain's smashed Fender guitar sells for almost \$600,000

Kurt Cobain's smashed Fender Stratocaster guitar sold at auction for \$595,900, more than 10 times its original estimate. The Nirvana frontman's left-handed electric guitar was smashed while the grunge pioneers were making their seminal Nevermind album in the early 1990s.

"COVID-19" Pandemic-

What comes from being a Woman

Women world always holds this tag of "What's next with you and from you". This worldwide pandemic infection COVID-19 still has its impacts on the World. Economic stress is observed to be the major issue after this pandemic. The impact of this on families has led to exploitation, gender based violence and finally leading into a greater risk of outbreaks towards women. This has also affected the woman in terms of health issue, ranging from sexual and reproductive health to maternal issues. Though the mortality of corona virus is more in man than in women, still in certain cases the major risk bearers are Women. Not to mention, the stress level and changes in the immune system of a pregnant, menstruating or a lactating woman, certainly increases the risk of infection and lately to their social acceptance. The same situation was observed during Ebola pandemic. Women suffered from maternal mortality and stillbirth. Our Government and Health care units must now start taking a good care of women especially towards their health and mortality issues. Lastly my sincere request to all the superwoman's to take a good care of their health and mental stability, during and post pandemic.

"As your well-being is a key for the good health of a family and strong society"

India's First Water Metro Launched

The new water transport service is called the Kochi Water Metro. This one-of-its-kind boat service is linked with the metro rail network. Also, these feeder boats are battery-powered, air-conditioned and

disabled-friendly, and are expected to connect several islands. Since they are battery-operated, these metro boats are going to be eco-friendly too. The project is under Kochi Metro Rail Corporation Limited. These boats will act as feeder service, just like we have metro feeder bus services. Recently, PM Narendra Modi flagged off the first phase of India's first water metro in Kochi.

New 3-D Facial Reconstruction of Tutankhamun Released

Live Science reports that a new 3-D facial approximation of the ancient Egyptian pharaoh Tutankhamun has been created by Michael Habicht of Flinders University, graphics expert Cícero Moraes, and their colleagues. The image was based upon existing computed tomography scans of the complete skull of Tutankhamun's mummy, and previously published X-rays and measurements of the skull. Review of this data confirmed that the skull was slightly longer than most, and that its brain volume was also larger than expected. "His skull has a particular shape; in our study the measurements showed affinities with skulls that underwent [skull reshaping], but this does not seem to be the case of Tutankhamun, because although it has a peculiar, elongated shape, everything indicates that it is a natural skull," Moraes said. Tutankhamun became pharaoh at the age of about nine years old upon the death of his father Akhenaten, then died about ten years later around 1323 B.C. "His reign saw a return to the old gods after his father Akhenaten's new [Aten] cult had failed and plunged the land on the Nile into chaos," Habicht added. For more on Tut's family and their legacy, go to "Rediscovering Egypt's Golden Dynasty."
