Generic Electives

Students of all Undergraduate programs are required to study 1 generic elective in each of the semesters from 3^{rd} to 6^{th} . They may choose any one of the following courses (excluding the courses offered by the parent departments, if not stated otherwise).

List of Generic Electives Generic Electives for III Semester

SN	Code	Nomenclature of the Course	Offering School
1	GE20B301	Introductory Biology	School of Sciences
2	GE20B302	Basic Analytical Chemistry	School of Sciences
3	GE20B303	Basic Instrumentation Skills	School of Sciences
4	GE20B304	Elementary Number Theory	School of Sciences
5	GE20B305	Production Technology for Vegetable and Spices	School of Agriculture
6	GE20B306	General Studies – I	Arts and Humanities
7	GE20B307	Basics of Acting	School of Performing Arts
8	GE20B308	C++ Programming	School of Advances Computing
9	GE20B309	Photography	School of Design
10	GE20B310	Introduction to Retail Chain System	School of Commerce

Generic Electives for IV Semester

SN	Code	Nomenclature of the course	Offering School
1	GE20B401	Genetics and Society	School of Sciences
2	GE20B402	Green Chemistry and Green Methods in Chemistry	School of Sciences
3	GE20B403	Electrical circuit network Skills	School of Sciences
4	GE20B404	Introduction to statistical methods and probability	School of Sciences
5	GE20B405	Farming System & Sustainable Agriculture	School of Agriculture
6	GE20B406	General Studies – II	Arts and Humanities
7	GE20B407	Script Writing	School of Performing Arts
8	GE20B408	R Programming	School of Advances Computing
9	GE20B409	Typography	School of Design
10	GE20B410	Building Leadership & Fellowship Skills	School of Commerce

Generic Electives for V Semester

SN	Code	Nomenclature of the course	Offering School
1	GE20B501	Biotechnology	School of Sciences
2	GE20B502	Pharmaceutical Chemistry	School of Sciences
3	GE20B503	Digital, Analog and Instrumentation	School of Sciences
4	GE20B504	Applications of Mathematic in Finance and Insurance	School of Sciences
5	GE20B505	Crop Improvement-I	School of Agriculture
6	GE20B506	Civil Services Aptitude Test – I	Arts and Humanities
7	GE20B507	Mime	School of Performing Arts
8	GE20B508	Web designing	School of Advances Computing
9	GE20B509	Fine Arts	School of Design
10	GE20B510	Resolving Conflicts and Negotiation Skills	School of Commerce

Generic Electives for VI Semester

SN	Code	Nomenclature of the course	Offering School
1	GE20B601	Bioinformatics and Systems Biology	School of Sciences
2	GE20B602	Pesticide Chemistry	School of Sciences
3	GE20B603	Elements of Modern Physics	School of Sciences
4	GE20B604	Mathematical Modeling	School of Sciences
5	GE20B605	Post Harvest Management and Value Addition of Fruits and Vegetables	School of Agriculture
6	GE20B606	Civil Services Aptitude Test – II	Arts and Humanities
7	GE20B607	Body Movement (Expressing through Body nuances)	School of Performing Arts
8	GE20B608	Python programming	School of Advances Computing
9	GE20B609	Digital learning-Adobe cloud	School of Design
10	GE20B610	Introduction to IFRS	School of Commerce

Course	INTRODUCTION TO OPERATING SYSTEM	Theory Lectures: 60
Name		Practical: 0
Course Code:	MG20BIT107	4-0-0-4

Course Code:MG20BIT107

Course Objectives:

- 1. To develop understanding about operating systems and process management.
- 2. To learn about the inter process communication and synchronization.
- 3. To develop knowledge about the memory and storage management.
- 4. To study the system protection and system security.

Units	Contents		
	Operating System Overview : Evolution and types of operating systems.		
	Process Management: Process concepts, operations on processes, process		
1.	control block. Scheduling: Types of schedulers, process scheduling	15	
	criteria, CPU scheduling algorithms, evaluation of scheduling algorithms.	15	
	Inter process Communication & Synchronization: Mutual Exclusion,		
	Semaphores, classic problems of synchronization, Deadlocks: reusable and		
2.	consumable resources, characterization of deadlock, prevention,	10	
	avoidance, detection and recovery from deadlocks.		
	Memory Management: Basic hardware, address binding, swapping,		
	contiguous memory allocation, paging, and segmentation, Virtual memory		
3.	Management: demand paging, page replacement algorithms, Allocation of		
3.	frames, Thrashing.	12	
	Storage Management: File concepts, access methods, directory structure,		
	file system implementation, directory implementation, disk space		
4.	management, disk structure and disk scheduling algorithms. I/O systems:	12	
	I/O Hardware, polling, interrupt driven I/O, direct memory access.	12	
	System protection: Goals of protection, domain of protection, access		
5.	matrix. access control. System Security: System problem, program threats,	11	
	system and network threats, security tool. User authentication.		

Course Outcomes		
At the end of the course student would be able to:		
CO1	Define Students will be able to have understanding of operating systems and	
	process management.	
CO2	Demonstrate Students will be able describe Inter process communication and synchronization.	
CO3	Utilize Develop basic knowledge on memory management and virtual memory	

	management.	
CO4	Illustrate Describe the storage management and input and output system.	
CO5	Interpret Students will have knowledge about system protection and system security.

Income categories for an event, expenses, venue, outdoor venues, indoor venues, budget for sets, security, sound & lights, generators, walkie talkie, pyros, advertising PR, print, hoardings, buses, public 	
 3. To describe about the income categories for an event. 4. To develop knowledge about the event market, technical and financial analysis. Units Contents Introduction to Event Cost Accounting: Objectives and scope of event cost accounting, event cost centres and cost units, event cost classification, profit measurement, decision making and control, elements of costing system, cost ascertainment, material cost, employee cost, direct expenses, overheads, making of a cost statement and profit calculations. Event Costing: Fixed cost & variable cost, volume profit analysis, break-even point, B.E.Panalysis for events, B.E.P. analysis as applied to event management and tactical decisions. Budget and Events: Introduction, making the budget, do's, don'ts, contingency, monitoring the budget, budget review, budget control & variance. Income categories for an event, expenses, venue, outdoor venues, indoor venues, budget for sets, security, sound & lights, generators, walkie talkie, pyros, advertising PR, print, hoardings, buses, public

walkie talkie, pyros, advertising PR, print, hoardings, buses, public	
4. relations, performers, use of cost centers in event management, event	
	14
management fees, percentage of the total event cost, flat fees, package	
price.	
Event market analysis, technical analysis, financial analysis, key	
issues in project analysis, project appraisal, financial appraisal,	
application for financial assistance, ratio analysis for events, means of 5.	10
financing, profitability & cash flow, managing cash flow in events	
significance, types of expenses, accounting pattern, evaluation.	

Course Outcomes		
At the end of	At the end of the course student would be able to:	
CO1	Define Students will be able to define event cost accounting.	
CO2	Demonstrate Students will be able describe about the fixed cost, profit analysis	
	and break-even analysis.	
CO3	Utilize the knowledge Developed to formulate budgets and events.	

CO4	Illustrate Describe the expenses, and income categories for an event.
CO5	Interpret Students will have knowledge about event market, technical, financial
	and project analysis.

	Macdonald and Evan.

Course Name:

FUNDAMENTALS OF IT IN BUSINESS PROCESS

Course Coo	le:MG20BIT207	3-0-1-4
Course Objectives: 3-0-1-4 1. To give students a basic understanding of DBMS concepts. 2. 2. To understand the the networking technologies used in business. 3. 3. To develop knowledge of coding languages. 4. 4. To know about the various softwares used in business.		
Units	Contents	Hours
1.	Database Management System: Components of data processing system, Three level architecture of data base management system (Data Abstraction), Relational data model, Network data model, Hierarchical model.	12
2.	Networking : Introduction to networking, Components of data communication, Communications channels, Networking, Networks types, Network types defined by their size and complexity, Centralized network, Network topology, Transmission media, Components of network.	10
3.	IntroductiontoProgrammingLanguage:Introduction,Programminglanguage,Machinelanguage,Assemblylanguage,Higher levellanguage,Compiler and interpreter	14
4.	Computer Virus: Virus, Types of virus, How virus spreads, Virus action, Virus effects, Antivirus program	14
5.	Software for Business Application: Business software, Types of business software tools, Brief history of business software, Customer Relationship Management (CRM), Strategy, Implementation issued, Privacy and data security, A Human Resource Management System (HRMS, EHRMS), Enterprise Resource Planning (ERP), Fax machine, E-mail (Electronic Mail), Use of CD ROM for business applications, Computer aided advertisement	10

Course Outcomes		
At the end	At the end of the course student would be able to:	
CO1	Define DBMS concepts.	
CO2	Demonstrate the networking techniques used in business process.	

Utilize programming languages to develop and understand the software development
process.
Illustrate and stimulate Critical thinking by applying programming tools in
business.
Interpret the use of various software applications used in business process.
